Room 3225  
St. Paul, MN 55155

Dear Senator Morrison, Senator Wiklund, Senator Klein, Senator Mann, and Senator Abeler,

The American Academy of Neurology (AAN), is the world's largest association of neurologists and neuroscience professionals, with over 40,000 members. The AAN's mission is to enhance member career fulfillment and promote brain health for all. A neurologist is a doctor with specialized training in diagnosing, treating, and managing disorders of the brain and nervous system such as Alzheimer's disease, stroke, concussion, epilepsy, Parkinson's disease, multiple sclerosis, headache and migraine.

The AAN writes to express our support for S.F. 3532. This legislation removes unnecessary burdens associated with prior authorization (PA) that create delays in care, including forbidding retrospective denials and setting a timeframe for PA review within five business days. The AAN strongly supports the passage of S.F. 3532 that will streamline the prior authorization process for physicians.

Utilization management tools such as PA can be time consuming and expensive administrative requirements that take away from direct patient care and be dangerous for patients. These tools not only cost an estimated \$93.3 billion annually on the US healthcare system,<sup>1</sup> but has also been reported to lead to patient treatment abandonment by 80 percent of physicians, with 33 percent reporting that PA has led to a serious adverse event (such as hospitalizations, permanent impairment, disability, or even death) for a patient in their care.<sup>2</sup> For neurologic patients with chronic conditions, there is often no "one size fits all" course of treatment. Prompt access to care is essential to minimize risks of dangerous complications and side effects.

Prior Authorization also creates high level of burden on the medical care system, with 88 percent of physicians describe the burden associated with PA as high or extremely high, averaging 45 prior authorizations a week, taking around 15 hours a week to

<sup>1</sup> <https://www.healthaffairs.org/doi/abs/10.1377/hlthaff.2021.00036>

<sup>2</sup> <https://www.ama-assn.org/system/files/prior-authorization-survey.pdf>

process. The gap between demand for and supply of neurologic services is widening due to several factors, including an aging population increasingly afflicted with neurodegenerative disorders.<sup>3</sup> Use of physician time to complete PA processes reduces patients' abilities to receive timely care. The AAN is very concerned by the expansion of PA throughout the health care system and supports efforts to protect the physician-patient decision-making process.

S.F.3532 will not eliminate prior authorization; instead, S.F.3532 is a multifaceted approach that will improve access to and continuity of care for patients, promote transparency and fairness in the prior authorization process, and minimize the use of unnecessary prior authorization for services that are routinely approved. These improvements will benefit many neurologic patients who require timely access to care for their chronic conditions.

On behalf of the AAN, our 40,000 members, and their patients, we thank you for your efforts and urge the passage of S.F.3532. Please don't hesitate to contact Grant Niver, State Affairs Program Manager, at [gniver@aan.com](mailto:gniver@aan.com) with any questions. Thank you for your leadership on this issue.

Sincerely,

A handwritten signature in black ink that reads "Carlayne Jackson". The signature is written in a cursive, flowing style.

Carlayne E. Jackson, MD, FAAN  
President, American Academy of Neurology
